

JAMES OLUSOGA

AI Solutions Engineer & Creative Technologist

Toronto, ON · Remote-friendly across NA · tdotssolutionsz@gmail.com · +1 416 528 6149

[linkedin.com/in/james-olusoga](https://www.linkedin.com/in/james-olusoga) · github.com/DareDev256 · jamesdare.com

github.com/DareDev256 — 32 public repos · 88 stars · 2,400+ commits · **Active client engagements:** *Edson Legal* (12+ yrs) · *BetMetrics.ca* (paying retainer)

AI Engineer shipping production multi-agent LLM systems in regulated industries — verifier-loop architectures, MCP servers, prompt-cached corpora, voice agents, real-time AI surfaces. Production LLM systems that have to be **right, not just plausible**.

- **Ship production AI for paying clients.** Lead developer on **BetMetrics.ca** — 377+ users, 795 wagers placed (665 single bets + 130 parlays), multi-region odds aggregation (11 sportsbooks), Convex auto-settlement engine, built to **AGCO/OLG (Ontario gaming) compliance standards** (KYC, age verification, responsible-use disclosures, audit trails). Concurrent 12+ year client relationship at **Edson Legal** — PII / medical / insurance-claim intake under **LSO Rule 3.1**, PIPEDA/PHIPA, and insurer-counterparty audit expectations.
- **Build at the frontier of the Anthropic ecosystem.** Shipped **Second Opinion** — 5-agent healthcare AI with a verifier loop fact-checked against a 52-source clinical corpus and ~90% prompt-cache cost reduction (Cerebral Valley × Anthropic hackathon, Apr 2026). Shipped **Sandy Chain-Recall** — cross-property hospitality AI with Claude tool use + custom-cloned voice agents (Rosewood Sand Hill hackathon, May 2026). Two published MCP servers — **FCPXML MCP** (Final Cut Pro, 50+ GitHub stars, 955 tests — now dual-mode: drives a live Final Cut Pro instance) and **Passion Memory MCP** (knowledge graph + vector embeddings + cross-session handoff).
- **Solo-build pace + multi-stack range.** Architect of the **Passion ecosystem** — an autonomous AI agent + memory MCP + real-time dashboard running 24/7 across two machines (130+ modules, 100K+ LOC). 10+ years shipping creative and technical products, from RIAA-certified music videos to production AI pipelines.

EXPERIENCE

Lead Developer (Contract)

BetMetrics.ca — Toronto, ON | May 2026 – Present (recurring retainer)

- Multi-sport social betting platform shipped to **377+ users with 665 single bets and 130 parlays placed** across NBA / NHL / MLB / NFL / MLS / UFC / NCAA / FIFA World Cup — grown from a sportsbook MVP into a full engagement economy (blackjack, head-to-head duels, daily challenges, fantasy wallets + leaderboards, forum, live chat).
- Architected multi-region odds aggregation (11 sportsbooks via The Odds API + ESPN consensus fallback), Convex-based auto-settlement cron (30-min cadence), role-based admin (owner / admin / mod), 35-test infrastructure-integrity suite.
- Built to **AGCO/OLG (Ontario gaming) compliance standards** — KYC, age verification, responsible-use disclosures, and audit trails (the same shape of compliance problem as regulated financial services). Push notifications (VAPID), AODA accessibility pass, Mozilla Observatory grade B+.
- Stack: Next.js 16, React 19, Convex, Clerk, Tailwind 4, Vercel.

AI Solutions Engineer & Creative Technologist

Freelance / DareDev256 — Toronto, ON | Feb 2025 – Present

- **Passion (autonomous AI ecosystem — built solo, running 24/7).** End-to-end system spanning two machines. **Passion Agent (v4.94, 130+ modules, 100K+ LOC)** — goal-driven KPI engine, adaptive scheduling, per-call cost tracing, durable execution checkpoints, 6-stage career pipeline (discover→score→tailor→apply→track→learn), applying via Playwright against Greenhouse and Lever. **PACT Dashboard (v0.111, 121 components)** — real-time command terminal with 76 API routes, 81 React Query hooks, Web Terminal (PTY shell), Web Push, STT voice input. **Passion Memory MCP Server** — persistent brain with knowledge graph, vector embeddings, somatic markers (Damasio), narrative identity (Bruner); session handoff eliminates cold starts across Claude Code sessions. Stack: Node.js, Claude/Gemini/DeepSeek APIs, Discord.js, Next.js 16, React 19, TanStack Query, Bun, SQLite, PM2.
- **Second Opinion — multi-agent healthcare AI (Cerebral Valley × Anthropic submission).** 5 Claude Opus agents (3 specialists in parallel + synthesizer + verifier) turn a patient medical chart into a cited appointment brief. Verifier fact-checks every claim against a 52-source clinical corpus before output; green / yellow / red verdict gates clinical handoff. Prompt-cached corpus (~32.5K tokens) delivers ~90% input-cost reduction on warm calls. Open-source. Stack: Next.js 16, React 19, Anthropic SDK with `cache_control: ephemeral`, NDJSON streaming.
- **Sandy Chain-Recall — cross-property hospitality AI (Rosewood Sand Hill hackathon, with Joshua Dare).** AI memory layer on top of Oracle OPERA (via Hapi). Front-of-house staff receives a 12-section prep brief at the moment of arrival. Custom-cloned Sandy + Hill voices, 5-language guest greetings, GDPR Art. 17 privacy opt-out, live ETA + arrival map, Manager Console split view. Built in 8 hours. Open-source. Stack: Next.js 16, Claude Opus with tool use, ElevenLabs Turbo + Multilingual v2, SSE, Mock Oracle OPERA adapter.
- **FCPXML MCP Server — first MCP server for Final Cut Pro (50+ GitHub stars, 955 tests).** Reads, modifies, and generates professional video timelines via natural language — and as of v0.9 runs **dual-mode: drives a live Final Cut Pro instance** (push-to-timeline, library listing via Apple-event control, verified against FCP 12.2). FCPXML 1.14 + `.fcpxml` sidecars, media relink, DTD validation. Security-hardened (path traversal, XXE prevention, SAST). Python + MCP SDK.
- **ShopBayHQ — automotive retail platform (shipped, live at app.shopbayhq.com).** Full security-hardening pass (mass-assignment, owner-boundary, and session-fixation fixes; zero prod npm-audit findings; lint 108→0; self-cleaning e2e suite) plus **Holo Lot** — an interactive 3D showroom rendering hologram vehicles with per-model Audi/Mercedes silhouettes via a lazy-loaded Three.js + GLB pipeline. Self-hosted (PM2 + Cloudflare Tunnel, LaunchAgent always-on). Auto-produced a 78s launch video (TTS narration + Playwright app footage + ffmpeg).

- **Security hardening sprint across the ecosystem** — shell-injection prevention, path-traversal guards, 41 atomic-write migrations, SAST pattern detection, port scanning, SSL cert monitoring.

Automation Engineer (Independent Project)

Audi Downtown Toronto — Toronto, ON | Oct 2025 – Dec 2025

- Designed and built a vehicle workflow tracking application for a high-volume luxury dealership in coordination with service advisors, technicians, and managers — improving operational visibility across the team.
- Kanban-style state engine (detailing / service / delivery) with color-coded status indicators and role-based views — reduced coordination friction and improved handoff clarity.
- Implemented offline-resilient architecture ensuring continued operation during network interruptions.

AI Product & Community Strategist

Nin Online (Steam MMORPG) — Remote (concurrent) | Jun 2019 – Feb 2026

- Led creative and strategic initiatives for a live Steam MMORPG, coordinating with developers, moderators, and community leads across multiple regional teams.
- Designed and built **NinWikiBot** — automated knowledge system reducing documentation overhead and onboarding friction. Open-sourced as `fandom-wiki-bot-template` for other game communities.
- Drove organic promotion via streamers and YouTubers, increasing reach without paid advertising.

AI Workflow Consultant & Web Developer (Concurrent Client)

Edson Legal — Toronto, ON | 2013 – Present

- Built **Barry Edson Legal AI** — CRM with AI-powered intake automation, increasing consultation bookings 40%. Pipeline ingests highly sensitive client credentials (PII, medical records, accident/injury reports, insurance claim documentation, policy details, prior coverage history) and structures them into case files — risk-assessment and claim-vetting workflows directly adjacent to insurance underwriting and adjuster intake.
- Operate under strict privacy and confidentiality requirements — Law Society of Ontario rules, PIPEDA/PHIPA compliance, and insurer-counterparty audit expectations. Built secure intake forms, access-controlled CRM views, and audit-logged automations.
- Earlier workflow automation (appointment reminders, follow-ups, email sequences via Twilio + OpenAI) reduced manual admin tasks 60%. Daily user of **Microsoft 365 Copilot** for document summarization, Word/Excel/Outlook automations, and intake-document triage.
- Designed and developed the firm's website, modernizing digital presence for lead generation and credibility.

Creative Technologist

Forest Hill Real Estate — Toronto, ON | Dec 2021 – Feb 2025

- Delivered 100+ branded video and photography campaigns for luxury real estate listings in coordination with the brokerage's marketing and sales teams.
- Leveraged AI-assisted editing tools reducing post-production time by 35%+.
- Designed AI-tagged content systems improving asset organization, discoverability, and delivery speed.

Founder & Executive Producer

TdotsSolutionsz / KushdUp Filmsz → 6ixBuzzTV — Toronto, ON | Jan 2010 – 2019

- Founded creative production company delivering video and brand development for artists including Chief Keef, Migos, and Masicka. Oversaw end-to-end production across 350+ music video projects with multi-person crews (DPs, editors, colorists, audio).
- Built **KushdUp Filmsz** YouTube channel (30K+ subscribers); grew, sold, and rebranded it into **6ixBuzzTV**, serving as **Executive Producer through 2019** (now 2M+ followers).
- Earned **RIAA Gold certification** for music video work.

HACKATHONS

- **Hospitality 2030 hackathon at Rosewood Sand Hill** (*May 16, 2026*). Anthropic + ElevenLabs sponsored. Shipped **Sandy Chain-Recall** with Joshua Dare in 8 hours — AI memory layer for luxury hotels with custom-cloned voice agents, cross-property arrival briefs, and GDPR opt-out. Repo: github.com/DareDev256/chain-recall · Live: chain-recall.vercel.app.
- **Cerebral Valley x Anthropic** — **"Built with Claude Opus 4.7"** hackathon (*Apr 2026*). Shipped **Second Opinion** — 5-agent healthcare AI verifier loop. Open-sourced.

CORE COMPETENCIES

AI & Agents: Claude API (Opus / Sonnet / Haiku), Anthropic Claude Code, Claude Agent SDK, **Anthropic Tool Use** (function calling, structured handoffs), Gemini API, DeepSeek API, OpenAI API, LLaMA (via Ollama — local multi-model benchmarking), **Model Context Protocol (MCP)** — **built/published servers** (FCPXML MCP, Passion Memory MCP), **Anthropic Prompt Caching** (ephemeral cache_control, ~90% input-cost reduction on warm calls), **Multi-Agent Orchestration**, **Verifier-Loop** / **Chain-of-Verification** (Second Opinion green/yellow/red verdict gating), Agent Eval & Observability, RAG Systems, LLM Integration, **Prompt Engineering** (schema-enforced JSON outputs, few-shot with curated corpora, Chain-of-Thought + Chain-of-Verification, adversarial-frame verifier prompts, A/B testing + regression suites, cross-corpus hallucination detection), **Vision Parsing** (multi-doc), **Structured Outputs**, **NDJSON Streaming**, **Server-Sent Events (SSE)**, **ElevenLabs SDK & Voice Agents** — Turbo + Multilingual v2 (custom voice

cloning, 30+ languages), LangChain, LlamaIndex, **Vector & Hybrid Search** (pgvector, SQLite + embeddings, semantic search), Autonomous Agent Architecture, Browser Automation (Playwright)

Technical: Python (LLM API integration, prompt-eval harnesses, MCP server development, async with asyncio + httpx, pytest), JavaScript / Node.js (ES Modules), TypeScript, React 19, Next.js 16 (App Router · Server Components · API Routes · Edge runtime), Three.js / React Three Fiber, Convex, Clerk, FastAPI, SQLite, PostgreSQL, Discord.js, Bun, PM2, **launchd / LaunchAgent** (macOS always-on services), Tailscale (self-hosted mesh networking), Git, GitHub Actions, Docker, Vitest, Tailwind 4, TanStack Query, n8n, Twilio, Vercel (Edge Functions, deployments, env management)

Regulated-Industry & Compliance: Handling sensitive client credentials (PII, PHI, financial, insurance-claim, identity), KYC / age-verification flows, audit-logged automations, role-based access control, AGCO/OLG (Ontario gaming) compliance audits, PIPEDA / PHIPA awareness, Law Society of Ontario confidentiality rules, OWASP-aligned security review, awareness of **insurance industry regulatory context** (OSFI, FSRA, privacy-of-personal-information requirements for insurers and intermediaries)

MCP Server Development: Published two production MCP servers — **FCPXML MCP** (dual-mode Final Cut Pro: FCPXML read/generate + **live Apple-event control of a running FCP**, 955 tests, 50+ GitHub stars) and **Passion Memory MCP** (knowledge graph + vector embeddings + somatic markers + cross-session handoff). MCP protocol design, tool schema authoring, transport (stdio + HTTP), session lifecycle, security hardening (path traversal, XXE, shell injection).

Domain Expertise: **Healthcare AI** (Second Opinion · 52-source clinical corpus · multi-agent verifier loop) · **Hospitality AI** (Sandy · Oracle OPERA + Hapi integration boundary · 10+ years luxury-venue video production) · **Legal Tech** (Edson Legal · 12+ years · PIPEDA/PHIPA/LSO confidentiality) · **Sports & Gaming** (BetMetrics · AGCO/OLG compliance standards) · **Creative AI** (FCPXML MCP · 350+ video projects · RIAA Gold certified)

Product: Product Strategy, Roadmapping, Stakeholder Management, User Research, Agile / Scrum, Technical Documentation

Creative: Video Production (350+ projects), Motion Graphics, Content Strategy, Brand Development

KEY PROJECTS

Project	Stack	Description
Passion (ecosystem)	Node.js · Next.js 16 · Claude / Gemini API · MCP · Bun · SQLite	Autonomous AI system built solo, running 24/7 — Passion Agent (v4.94, 130+ modules, 100K+ LOC), PACT Dashboard (v0.111, 121 components, real-time terminal, web push, STT input), Passion Memory MCP Server (knowledge graph, vector embeddings, somatic markers, narrative identity, cross-session handoff).
Second Opinion	Next.js 16 · React 19 · Anthropic SDK · Claude Opus · Prompt caching · NDJSON streaming	5-agent multi-agent healthcare AI — 3 specialists in parallel + synthesizer + verifier turn a patient medical chart into a cited appointment brief with green/yellow/red clinical handoff verdicts. Fact-checked against 52-source clinical corpus before output. Prompt-cached corpus (~32.5K tokens) delivers ~90% input-cost reduction on warm calls. Built initially for adenomyosis; corpus expanding to fibroids, endometriosis, Hashimoto's, long COVID, lupus, POTS. <i>Open source.</i>
Sandy Chain-Recall	Next.js 16 · Claude Opus (tool use) · ElevenLabs Turbo + Multilingual v2 · SSE · TypeScript · Vercel · Mock Oracle OPERA adapter	AI memory layer for luxury hospitality — composer agent turns a member's cross-property history into a 12-section staff brief at the moment of arrival. Custom-cloned Sandy + Hill duo voices, 5-language guest greetings, privacy opt-out (GDPR Art. 17 cited verbatim), live ETA + arrival map, Manager Console split view. Built in 8 hours with Joshua Dare, May 2026. <i>Open source.</i>

BetMetrics.ca	Next.js 16 · React 19 · Convex · Clerk · Vercel	Multi-sport social betting platform for paying client (recurring retainer) — 377+ users, 665 bets + 130 parlays placed, Convex auto-settlement engine (30-min cron), multi-region odds aggregation (11 sportsbooks via The Odds API), social/engagement layer (blackjack, H2H duels, daily challenges, fantasy wallets + leaderboards, forum, live chat), built to AGCO/OLG compliance standards, AODA accessibility pass, Mozilla Observatory grade B+.
ShopBayHQ	Next.js · Three.js / R3F · PM2 · Cloudflare Tunnel · Vercel	Automotive retail platform shipped + deployed (app.shopbayhq.com). Security-hardened (mass-assignment / owner-boundary / session-fixation fixes, 0 prod npm-audit, lint 108→0, self-cleaning e2e). Holo Lot — interactive 3D showroom with hologram vehicles (per-model Audi/Mercedes silhouettes, lazy Three.js + GLB loader). Self-hosted always-on; 78s auto-produced launch video.
Barry Edson Legal AI	n8n · Twilio · OpenAI · CRM	AI-powered intake automation for personal-injury law firm (12+ year client relationship). Increased consultation bookings 40%, reduced manual admin tasks 60%. Pipeline ingests sensitive client credentials (PII, medical records, accident/injury reports, insurance claim documentation) under LSO Rule 3.1, PIPEDA/PHIPA, and insurer-counterparty audit expectations.
FCPXML MCP Server	Python · MCP SDK · lxml · Apple-event control	First MCP server for Final Cut Pro — reads/modifies/generates professional video timelines via natural language, and as of v0.9 drives a live Final Cut Pro instance (push-to-timeline, library listing, verified vs FCP 12.2). 955 tests, 50+ GitHub stars . Security-hardened (path traversal, XXE prevention, SAST). <i>Open source</i> .
tdotssolutionsz.com	React 18 · Three.js / R3F · Vite · GSAP · Vercel	"Toronto's Hip-Hop Visual Engine" — cinematic music video portfolio with editorial 3-color palette (charcoal · white · cobalt) and 3D Tunnel catalog. 101 videos · 54 artists · 25.3M+ views. Theater mode, audio visualizer, shuffle play, fuzzy search. Web Design showcase for client work. 710 tests / 49 suites.
